Observational Assessment of Sensory Preferences of Infants and Toddlers with Visual Impairments

Adapted Form from Koenig and Holbrook (1995)

Child's Name:

Behavior Observation #4

Behavior Observation #5

Behavior Observation #6

By Tanni L. Anthony, Ph.D., 1997, Revised 2003

 Instructions: Make arrangements to observe the infant and toddler deminutes. Be sure to include routines at the child's home. Include all primary caregivers as members of the observation, record all senses the child aphow the child uses each sense. For example, if during the chair tray to find bits of food, circle the behavior as T, describe the child's behavior "swiped with left hand to 4. After you have completed all observations look for path that is marked most often is probably the child's prefer frequently used sense as the secondary sensory preferences to be learning activities for the child. 	ne, daycare, vation team opears to us the first obstand make refind pieces terns and fired sensorynce.	or other n. e. Note: ervation notes und s of food requency / learnin	specific of the children the of the construction of sensor g mode.	he child example ld tactile bservation ory beha Choose	frequent s of ly search on that br viors.
